Allowable Subject Matter

3. **Claims 1-9** are allowed.

4. The following is an examiner's statement of reasons for allowance:

As per **claims 1-9**, the independent claim 1, from which the claims depend, recites the computer-assisted schematic linking method for electronic components comprising the inventive steps of processing schematic linking operation for linking the first electronic component and the second electronic component, wherein the first and second electronic components are selected based upon a combination of the steps of

establishing, selecting, searching, providing, as claimed, which the prior arts made of record failed to teach or suggest. In particular, the prior arts made of record teach various methods of performing schematic linking operations among circuit components, including using databases with a particular signal naming convention (see especially **Garnett et al.**, U.S. Patent No. 6,516,456, especially col. 15, lines 13-56; **Ho**, U.S. Patent No. 6,438,729, especially col. 11, lines 19-36; col. 12, lines 33-60; **Gregory et al.**, U.S. Patent No. 6,132,109, especially col. 20, line 45 to col. 21, line 47; **Gont et al.**, US Patent No 6,738,957, especially col. 5, lines 27-57; col. 6, lines 27-60; **Southgate et al.**, U.S. Patent No. 6,588,004, especially col. 8, lines 37-59; **Brathwaite et al.**, U.S. Patent Application Publication No. 2003/0221172, especially paragraphs [0053], [0057], [0070]-[0078]). However, none of the prior arts made of record teach or suggest the combination of the inventive steps as claimed. Accordingly, the claimed invention is novel and un-obvious over the prior arts made of record.
